MARKINGS

Make all markings from pressure sensitive vinyl available from vinyl sign companies. Patterns for the early black and white markings are provided in order to cover all possible choices of schemes, early and late styles. See details on templates.

1. If using early style markings, the crosses are cut from black vinyl at the extreme borders of the templates. Then cut the white L-shaped vinyl parts. Install the black part using detergent and water. Squeegee the liquid from under the vinyl. Now remove part of the backing paper from the white vinyl "L"s and position to the black cross and install the sticky area down. Now remove balance of backing and press in place.

The swastika is made from white vinyl then the inside black part is cut and installed to the white in the same manner. Or you could put the black swastika onto about white vinyl then cut the white border. Pretty
